SKILLS

- **Languages:** Java, Python, DSA
- **Frontend:** HTML, CSS, JavaScript
- **Data Science:** NumPy, Pandas, EDA, Tensor Flow
- **Visualization:** Matplotlib, Seaborn, Microsoft Excel, Power BI
- **Tools/Platforms:** MySQL, Git, GitHub
- **Soft Skills:** Problem Solving, Communication, Teamwork, Adaptability, Time Management

PROJECT

Weather Pulse Real-Time Weather & Air Quality Web App | GitHub — Jan' 26 – Feb' 26

- Engineered a full-stack weather monitoring platform delivering real-time weather, precipitation
- Built a real-time weather dashboard providing forecasts and PM2.5 air quality insights using public APIs.
- Implemented a scalable Java backend with Servlets and MVC architecture to handle geocoding, data aggregation, and business logic.
- Designed smart alert rules to notify users of high temperature, heavy rain, and poor air quality based on user-defined thresholds.
- Developed a responsive, modern UI using HTML, CSS, and JSP for clean visualization of weather metrics and alert notifications.

Tech Stack: Java 21, Jakarta EE (Servlets), JSP, API, HTML, CSS, JavaScript

Car Sales Analytics Dashboard (Power BI) | GitHub — Nov' 25 – Dec' 25

- Analysed raw car sales data and transformed it into actionable business insights using Power BI.
- Established key KPIs including Total Sales, Average Selling Price, Total Cars Sold, and Average Cars Sold.
- Visualized year-wise sales trends, segmented performance by transmission type, and mapped state-wise results with colour-wise distribution.
- Enabled interactive exploration through slicers for drill-down analysis by year and model.
- Leveraged data modelling and crafted DAX measures to ensure accurate, dynamic reporting.
- **Tech Stack:** Microsoft Power BI, DAX, Data Modelling, Data Visualization

TRAINING

C++ Programming: OOPs and Data Structures | Certificate — Jun' 25 – Aug' 25

- Built a solid foundation in C++ programming, covering syntax, control structures, and core language features.
- Applied Object-Oriented Programming OOP principles including classes, inheritance, polymorphism, and encapsulation to structure programs effectively.
- Implemented fundamental Data Structures and Algorithms DSA such as arrays, linked lists, stacks, queues, and basic searching/sorting techniques.

Tech Stack: C++, Object-Oriented Programming, Data Structures & Algorithms.

CERTIFICATES

- Cloud Computing – NPTEL IIT Kharagpur | Link — Sep' 25
- Introduction to Git and GitHub – Google | Link — Apr' 24
- Intro to Hardware and Operating Systems – IBM | Link — Jul' 24

ACHIEVEMENTS

- Solved 200+ problems on Hacker Rank, Leetcode strengthening problem-solving skills in Java, data structures, algorithms, and logical reasoning.

EDUCATION

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; CGPA: 6.60 — Aug' 23 – Present
- **DVC Viveka Junior College** — Ponnur, Andhra Pradesh
  Intermediate; Percentage: 81% — Apr' 18 – Mar' 20
- **ST. Ann's School** — Ponnur, Andhra Pradesh
  Matriculation; Percentage: 76% — Apr' 10 – Mar' 20
